

DTF Transfer Authority Shopify POD Fulfillment App Developer Guide

Purpose

This document defines the technical and operational specifications for building a custom Shopify Fulfillment Service App where DTF Transfer Authority (DTFTA) acts as a ship-only, white-label Print-on-Demand fulfillment center for partner Shopify stores.

Fulfillment Model

- Ship-only fulfillment (no pickup)
- White-label shipping per partner store
- DTF Transfers and Apparel POD supported
- DTFTA registered as a Shopify Fulfillment Service + Location

Supported Apparel Blanks (v1)

- Next Level 6210 – Unisex Tee
- Next Level 3601 – Long Sleeve Tee
- Gildan 18500 – Heavy Blend Hoodie
- Cotton Heritage M2650CH – Heavyweight Hoodie

SKU Format (Mandatory)

DTFTA-APP-{CATEGORY}-{BRANDCODE}-{STYLE}-{COLORCODE}-{SIZE}

Example SKUs

- DTFTA-APP-TEE-NL-6210-BLK-XL
- DTFTA-APP-HOODIE-GD-18500-NAV-2XL
- DTFTA-APP-LS-NL-3601-HGR-L
- DTFTA-APP-HOODIE-CH-M2650CH-CHAR-XL

Required Line Item Properties (Apparel POD)

- dtfta_type = APPAREL_POD
- dtfta_garment_brand, style, color, size
- dtfta_print_plan (e.g. FRONT:12x16|BACK:12x16)
- Artwork URL(s) for each placement

DTF Transfer Requirements

- Artwork upload or URL
- Print width and height (inches)
- Rush and background removal flags

Core App Responsibilities

- Create Fulfillment Service and Location on install
- Receive Fulfillment Orders via callback endpoint
- Create DTFTA production jobs internally
- Generate white-label packing slips
- Push tracking and fulfillment updates back to Shopify

White-Label Rules

- No DTFTA branding visible to end customer
- Partner brand name and return address used
- Partner support contact on packing slips

Testing & Acceptance Criteria

- Orders route correctly to DTFTA fulfillment location
- Jobs created with full garment and print data
- Packing slips show partner branding
- Tracking syncs back to Shopify successfully
